

## Dear colleagues

Happy New Year! We ended the year in the innovation team with a bit of restructuring with Alexia taking over the role as Head of Innovation and Adrian moving to P&T as their new Head of Service. We know he will be amazing in his new role.

In Innovation, we look so much forward to working with our new awesome projects with our brilliant colleagues!

We still encourage all our colleagues to please drop by the innovation room at any time with any ideas, new technologies you'd like to have tested, suggestions for increasing our network, or whatever you would find relevant! Our doors are always open!

## We look forward to another exciting year - The Innovation Team

We are starting this year with this innovative project by Simon Villandsen. Together we will design a ballast water treatment skid in a container that will allow for vessels to de-ballast in docks when they arrive. The system can be easily moved from one port to another or temporarily placed on the ship if needed.

We will also be working on Digital Sales Tools with Line Fjeldsted Nissen. Given the importance of digital tools in the sales process, this project seeks to experiment new ways of taking advantage of that for Semco Maritime.

Last but not least, we will be working on developing DataInsight into the next level. As such, DataInsight will move from being a mere data harvester to the concept of Data Science with the purpose of enabling predictive maintenance.
