

## Dear colleagues

This edition shares exciting news about some 'firsts' in our Innovation Team: applying for funds and welcoming a new colleague. And as always, we would like to invite you to share your ideas or simply a cup of coffee with us - our doors are always open and we are always happy for a chat (and coffee!)

### **The Innovation Team - Alexia, Martin and Elizabeth**

#### **Automatic corrosion management**

To continue Phase II of our colleague Jeppe Lützhøft's project, we have applied for EUDP Funds. At the same time, we have new partners on board: Trefor, IPU, Aalborg University, MMSurvey, and Energy Cluster Denmark joined us to continue our adventure.

Looking forward to working and developing the project to new heights together.

#### **Martin Ejlskov - Innovation lead**

We would like to welcome Martin Ejlskov to the Innovation team as our Innovation Lead. Prior to joining our team, Martin was working for Energy Cluster Denmark as a Project Manager. He is from Odense, has one child, and he is was a professional handball player.

Welcome Martin to our team!

#### **Innovation coffee time**

On April 14th at 13h00, Trifork will inspire us with the concept of Data Mining and AI. We look forward to this online session and hope to see you there with us! [Click here to join the meeting](#)

We would really appreciate your input! Please let us know what you like our next session to be about. [Click here and share with us!](#)
