

Dear Colleagues,

While you are sharpening your pumpkin carving skills, let us introduce you to our October edition of the Innovation Newsletter. This time, we deliver your wish to see an Innovation Coffee Time about 3D printing, we provide you a perky insight to funding, and least but not last, we present you Esbjerg city's newest competition, which we just call Semco Innovation Challenge! Let's dive in for more details

The Innovation Team – Alexia, Martin, István

Innovation Coffee Time Session October – 3D Printing

You asked for it, we deliver it!

In September we asked you to vote about the content of our next ICT Session and you have decided to see an episode about Additive Manufacturing, or in most commonly known: 3D printing. On 26 October, we host Michel Honoré from Force Technology, who is expert in the topic and will help Semco Maritime understand how the technology can create value and what effect it has on the innovation journey. There will be time for Q+A at the end of the session, so you can also get your voice heard.

Follow [this link](#) to register and don't forget to add the event to your calendar.

We are looking forward to seeing you all.

Funding

Semco Maritime have applied for funds through EUDP. In fact Semco have sent in three applications to EUDP.

Let us introduce the projects for you:

- PACMAN – Further development of the of the Automatic corrosion Management system.
- Training for Transition – A new virtual training platform that includes VR, AR, MR and etc.
- Greensand – Pilot project on how the future of carbon capture storage could look.

We in the innovation team, love new ideas. Do you want to think bigger in your project? Feel free to drop by and introduce us to your idea. We might be able to scale it.

The first Semco Innovation Challenge

In the end of November/beginning December, Semco Maritime will host the first Semco Innovation Challenge together with one of our partners. The challenge aims to find an innovative solution to a real-life pain point in the shape of a one-day competition. The first edition of the challenge will consist of teams of students from SDU, AAU, EASV, Semco Maritime and our partner. The winner will be the team who can present a feasible business case and will be announced by the jury at the end of the day. The presentation of the business cases and the winner announcement will be live-streamed as our November edition of Innovation Coffee Time. If you are a student assistant at Semco Maritime and you wish to participate, please submit your application form [here](#).
