

ATEX/IECEx certified electrical panels

In-house design and fabrication of ATEX certified electrical panels for offshore assets and other potentially explosive atmospheres.

High level of expertise

It is a highly specialized task to make electrical solutions for the offshore markets and other potentially explosive atmospheres. It requires planning and a high level of expertise, which is achieved through a number of courses about new and existing standards. All documentation and handling are made in cooperation with suppliers of electrical panels and fulfil the supplier's demands for certificates.

All communication with suppliers is handled by competent and certified employees in cooperation with specialists from the in-house HSEQ department. This ensures compliance with ISO standards as well as other current requirements.

All electrical panels must fulfil a number of specific demands.

The ATEX/IECEx certification is your proof that Semco Maritime has carried out all necessary approval processes and ISO certifications.

In-house design team

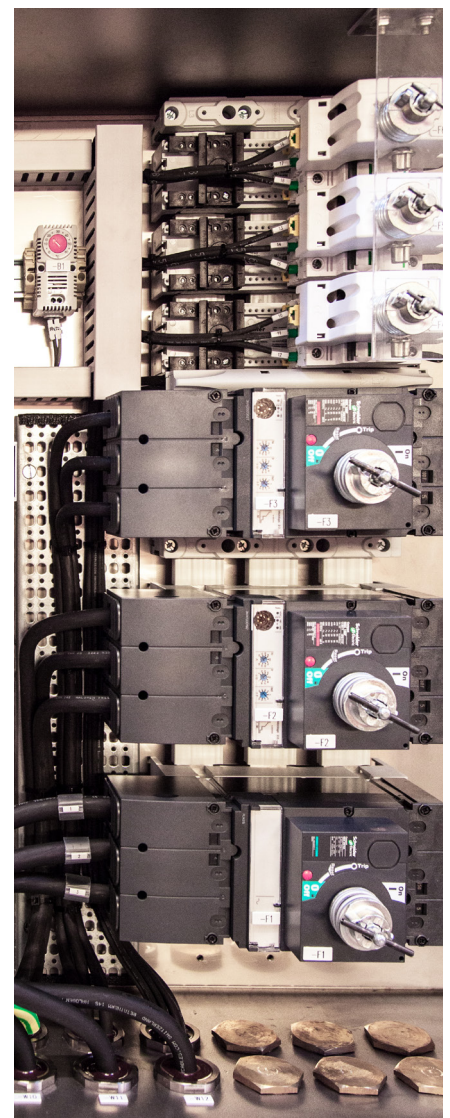

The ATEX/IECEx-certificates does not only cover the employees in the workshop, but also the in-house design team involved in the process. The design team is responsible for all calculations, drawings and specifications.

In order to deliver panels that meet customer demands, we offer in-house solutions directly to our customers,

Reliable electrical workshop

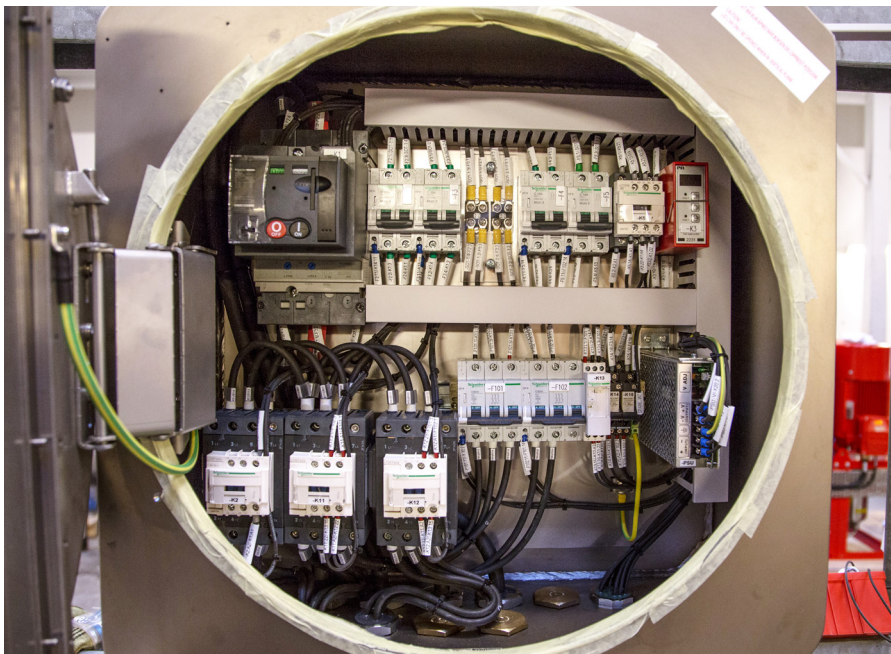

Our in-house electrical workshop has worked as a reliable, internal supplier of electrical, high-quality solutions for more than 30 years.

ATEX/IECEX certified electrical panels

ATEX/IECEX

certification relates to all products to be used in potentially explosive atmospheres, e.g. in areas where mixtures of air and flammable materials such as gases, vapours, mists and dust may occur.
