

# Scaffolding and rigging

## All locations are accessible

### Scaffolding specialists

For installation and maintenance support we offer teams with experience in erecting scaffolds onshore and offshore for all applications within the oil & gas, marine and industrial markets.

### Aluminum Scaffolding

We use the leading aluminium scaffolding systems, which is unique due to the light weight of the equipment and the flexibility of the system.

### Authorised rental and sales

We are an authorised scaffold agent within rental and sales of aluminium scaffold.

### Safety comes first

Our scaffold designs fulfil the requirements of the »Working at Height Regulations« and are completed to the highest technical standards.

All designs are in accordance with ISO 9001 procedures and incorporate design risk assessments where necessary.

### Our scaffolding offerings include:

- Heavy-duty scaffold for crane boom replacements on access platforms.
- Stair towers and gangways for offshore rigs and vessels.
- Complete custom-made roofing, i.e. corridor areas.
- Suspended scaffolding i.e. under helidecks, over the side, in and out of tanks and silos, including technical rooms.
- Scaffolding and jack-up leg enclosure.
- Habitats and pressurised tents for coating, including cold and hot work for harsh-environment areas.

### QuikDeck a flexible platform solution

QuikDeck is a hanging scaffolding system by the Safway Group. Semco Maritime is a single supplier for the North Sea.

Advantages of QuikDeck:

- Safe working on open modular platforms
- One person can easily handle the components
- Assembly of the system does not require any special tools
- Load capacity up to 360 kg/m<sup>2</sup>
- Can be built in the air or on the ground and then hoisted into place

## Rigging

Our experienced and certified teams carry our rigging within the Oil & Gas, marine and industrial markets. Our services include:

- Replacement of main engines, transformers switchboards and other fragile equipment
- Removals and replacements
- Thruster handling
- Removal of drilling equipment and installation projects.
- Pipework installations
- Complex steel structures during installation
- Sewage units

Our extensive experience is supplemented with relevant courses and we operate under both Norwegian and Danish rigging certificates. We provide required rigging equipment and relevant planning and documentation such as lifting plans for complex rigging assignments.
