

Service, maintenance and modification

for offshore wind assets

Flexible service solutions

Minimizing loss of revenue and downtime!

We base our flexible service solution on a foundation of more than 40 years of experience from offshore projects. Our large organisation of qualified technicians and specialists is your guarantee for quick mobilization of experienced multi-skilled service teams anywhere in Europe.

In Semco Maritime, safety is part of our DNA and our first priority is always to safeguard people, the environment and your assets! We are third party certified and we comply with the highest international safety standards.

Our multi-skilled team finds faults and come up with solutions to ensure minimized loss in revenue or downtime. They have experience within all systems of the offshore wind farm - from electrical and mechanical work to scaffolding and commissioning support.

If you have an issue on your wind farm that requires immediate or long term attention, just give us a call.
